  GPA: 9.2

EXPERIENCE

KODNEST(INTERN)

- Developed Java-based solutions: Applied expertise in Java, Spring, Hibernate, JDBC, OOPs, and SQL to contribute to a live project, demonstrating practical knowledge in software development.
- Ensured software quality and UI enhancement: Conducted testing and utilized HTML, CSS, and Bootstrap to manually improve user interfaces, bolstering front-end development proficiency within a project setting.

PROJECTS

1. **Hospital App using Java and Spring Boot**
   Role: Sole Developer
   - Spearheaded the creation of a comprehensive Hospital App leveraging Java and Spring Boot technologies. This innovative application serves as a centralized platform for streamlining various hospital operations, enhancing efficiency, and ensuring top-notch patient care.
   - Technology used: JAVA, SPRINGBOOT, MySQL.

2. **Shop Management System**
   Role: Team Lead
   - Created a comprehensive Shop Management System to streamline communication and handle data.
   - Technology used: HTML, CSS, JavaScript, and MySQL.

3. **Mental Education (Android App)**
   Role: Team Lead
   - Developed an application to provide information on mental health disorders.
   - Technology used: Java, Android Studio, XML.
